WORK EXPERIENCE

Business Analyst, Freelance

02/2025 – Present | United Kingdom

- Built investor-grade unit economics model (LTV, CAC, payback period, contribution margin per order) from raw operational data across invoices and delivery commissions; used in 3 angel pitches, client closed £180K pre-seed round within 6 weeks, investor citing unit economics clarity as a differentiator.
- Identified +3.2pp gross margin improvement for a D2C skincare brand (£1.4M revenue, 12 SKUs) via Van Westendorp price sensitivity survey (n=340) and 8-competitor benchmarking implemented with no measurable volume decline.
- Diagnosed activation gap not pricing as root cause of early churn for a 2,200-subscriber SaaS via 14-month cohort segmentation of Mixpanel data; designed Day-3 A/B test achieving 18% reduction in 30-day churn over 8 weeks.
- Surfaced £87K inventory reduction opportunity via ABC-XYZ analysis on a 1,400-SKU wholesale catalogue; identified £40K/year returns leakage and 22% cross-site food cost variance via Looker Studio dashboards.

Business Data Analyst, Incentius

07/2022 – 08/2023 | Pune, India

- Co-developed analytics pipeline (Talend, Tableau, Python) for a US Fortune 500 communications client covering pricing performance, incentive tracking, and tenure analytics, reducing manual reporting by 30–40% across 5 concurrent client engagements.
- Built Tableau geospatial dashboard with territory drill-down for a healthcare client; contributed to Power BI dashboard tracking gross margin and EBITDA for manufacturing client supporting C-suite decisions.
- Supported delivery of CFO cash management dashboard tracking DSO, DIO, DPO, and 12-month cash flow projections across 4 industry verticals with 3–5 cross-functional stakeholders per engagement.

Business & Financial Operations, Bhor Bee Biyane (Retail Agri Shop- Family Business)

04/2018 – 06/2022 | Pune, India

- Digitised a 6-store agricultural retail operation and improved gross margins by approximately 15% across a 200+ product agricultural range (seeds, fertilisers, pesticides) by building Excel financial models from scratch tracking COGS, supplier pricing, and working capital enabling data-informed pricing decisions in place of ad hoc mark-ups.
- Protected seasonal cash flow by structuring a dual-credit monitoring system tracking farmer credit accounts against harvest repayment cycles, reducing overdue balances and maintaining liquidity during the agricultural off-season.
- Reduced stockout incidents by approximately 20% during peak planting seasons by modelling product-level sales velocity data to forecast volatile seasonal demand across seeds and agrochemicals, enabling proactive reorder scheduling.
- Defended input margins by auditing procurement data across 30+ suppliers, identifying order consolidation opportunities, and delivering vendor renegotiation recommendations that reduced costs on high-volume product lines.

Supply Chain and Operations Intern, Tara Tools

09/2021 – 02/2022 | Pune, India

- Optimised vendor supply planning accuracy by extracting and analysing procurement performance data across 30+ vendors using SAP ERP (MM module) including purchase order tracking, goods receipt, and invoice verification workflows.
- Minimised production scheduling delays by proactively diagnosing supplier lead-time variances using SQL-driven inventory discrepancy analysis, cutting average delay resolution time by approximately 20%.

EDUCATION

MSc Business Analytics – Merit (63.6%/100), University of Manchester

09/2023 – 09/2024

- Awarded fully funded merit-based international scholarship (Top 5 statewide, Government of Maharashtra)

B.E. (Mechanical) – Distinction (CGPA- 9.55/10), Savitribai Phule Pune University

07/2018 – 07/2022

- Recipient of fully funded merit-based scholarships (Government of Maharashtra, Lila Poonawalla Foundation)
- Team Lead, BAJA SAE India**- Managed cross-functional 27-member team, conducting risk-based failure analysis (DFMEA/PFMEA) to improve vehicle reliability by ~15% and assembly efficiency by ~10%.

TOOLS & SKILLS

- Analytics & BI: Power BI (DAX) — Expert | Tableau — Proficient | Advanced Excel — Expert
- Languages & Data: Python (Pandas, Scikit-Learn) — Proficient | SQL — Proficient | R — Proficient
- ML & Statistics: Time Series Forecasting, K-Means Clustering, Isolation Forest, Gradient Boosting, ARIMA, A/B Testing, Cohort Analysis, Regression Analysis
- Business Analysis: Unit Economics, Pricing Strategy (Van Westendorp PSM), Requirements Gathering, KPI Design, Process Mapping, Stakeholder Management, ABC-XYZ Analysis, MECE Frameworks
- Operations & ERP: SAP ERP (MM Module), Supply Chain Analytics, Demand Planning
- Data Engineering: Talend, ETL Pipeline Design, Automated Reporting
- Project Delivery: Agile (Scrum), Six Sigma Yellow Belt, GDPR Awareness

LANGUAGES

English: Fluent, **German:** B1- Actively learning

CERTIFICATES

Google Project Management Specialisation | Six Sigma Yellow Belt | Six Sigma Green Belt
