

VAISHNAVI BHOR

Business Analyst | Data Analyst | BI Analyst

vaishnavibhor123@gmail.com | +44 7393063448 | Manchester, United Kingdom | [LinkedIn](#) | [Github](#) | [Portfolio](#)

PROFILE

Business/Data Analyst with hands-on experience across requirements gathering, BI dashboarding, and predictive analytics; delivered £180K+ in measurable client impact through independent consulting engagements spanning pricing, churn, and inventory optimisation. Skilled in translating ambiguous business problems into structured, stakeholder-ready analysis using SQL, Python, and Power BI.

PROFESSIONAL DEVELOPMENT

McKinsey Forward Programme, 10-week professional development programme (In Progress) 09/2026 | United Kingdom

- Developing a **structured, hypothesis-led approach to problem solving**, including defining SMART problem statements, breaking problems into issue trees, prioritising key issues and planning analysis.
- Applying **data-driven analysis and synthesis** to identify key insights, determine the “so what” and develop evidence-based, actionable recommendations.
- Strengthening **stakeholder communication** by structuring complex information, focusing on key messages and tailoring recommendations to different audiences.
- Building practical **digital and AI capabilities**, including using GenAI to summarise information, interpret data and support analysis responsibly, alongside adaptability and collaborative working skills.

EDUCATION

MSc Business Analytics – Merit, *University of Manchester* 09/2023 – 09/2024

- Achieved fully funded merit-based international scholarship (Top 5 statewide, Government of Maharashtra)

B.E. (Mechanical) – Distinction (CGPA- 9.55/10), *Savitribai Phule Pune University* 07/2018 – 07/2022

- Recipient of fully funded merit-based scholarships (Government of Maharashtra, Lila Poonawalla Foundation)
- Team Lead, BAJA SAE India**- Managed cross-functional 27-member team, conducting risk-based failure analysis (DFMEA/PFMEA) to improve vehicle reliability by ~15% and assembly efficiency by ~10%.

WORK EXPERIENCE

Business Analyst, *Computewell Limited (Data & IoT Solutions)* 01/2025 | Weybridge, UK

- Worked directly with clients to gather and document business requirements, turning loosely defined problems into clear specifications for data migration and reporting projects
- Built Power BI and Tableau dashboards using SQL and Python-processed data, giving clients visibility into trends they didn't have before
- Supported migration of client data from legacy systems into modern data platforms, and presented findings to both technical and non-technical stakeholders

Business Data Analyst, *Incentius* 07/2022 – 08/2023 | Pune, India

- Gathered and documented business requirements from 3 to 5 stakeholders per engagement, translating operational needs into functional specifications for automated reporting solutions (Talend → Python → Tableau) serving Fortune 500 clients; eliminated 40+ hours/week manual reporting. Delivered executive presentations used in VP-level monthly reviews
- Analysed existing business processes and documented requirements for a Power BI margin waterfall with variance analysis (DAX — price, volume, mix, cost effects) for manufacturing client; collaborated with technical colleagues to deliver a solution adopted for quarterly board reporting.
- Mapped billing and cash management workflows across 4 verticals, translating business needs into a KPI dashboard (DSO, DIO, DPO, 12-month forecasting); managed cross-functional requirements gathering with 3–5 stakeholders per engagement.

Business & Financial Operations, *Bhor Bee Biyani (Retail Agri Shop- Family Business)* 04/2018 – 06/2022 | Pune, India

- Built P&L management models (COGS, pricing strategy, budgeting, working capital) — improved gross margins ~15% across 200+ SKUs. Variance analysis against cost benchmarks identified mispriced product lines.
- Developed demand forecasting for seasonal planning; reduced stockout ~20% during peak. Audited 30+ suppliers — delivered cost optimisation through consolidation and renegotiation.
- Structured credit monitoring with actuals-vs-plan tracking — protected cash flow during 4-month off-seasons (60% revenue drop). Cross-functional collaboration with field staff to validate assumptions.

Supply Chain and Operations Intern, *Tara Tools* 09/2021 – 02/2022 | Pune, India

- Optimised vendor supply planning accuracy by extracting and analysing procurement performance data across 30+ vendors using SAP ERP (MM module) including purchase order tracking, goods receipt, and invoice verification workflows.
- Minimised production scheduling delays by proactively diagnosing supplier lead-time variances using SQL-driven inventory discrepancy analysis, cutting average delay resolution time by approximately 20%.

FREELANCING AND ANALYTICAL PROJECTS (POST-MSC, OCT 2024 – PRESENT)

Independent consulting and self-directed analytical work while based in the UK. Full methodology and outputs on [portfolio Site](#)

- **UK Meal-Kit Startup (Sakshee's Kitchen)** — Unit Economics & Investor Model | Client closed £180K pre-seed raise within 6 weeks
Engaged by a pre-seed D2C meal-kit startup preparing for its first funding round with no structured view of customer economics. Reconstructed COGS from three unstructured sources and built an LTV (£94) / CAC (£68) / payback (11 months) model from scratch. Identified referral as 3× more efficient than paid social and recommended a channel shift to reduce blended CAC by £8. One investor cited the unit economics clarity as a differentiator in the raise.
- **D2C Skincare Brand (6TEEN)** — Pricing Strategy | £67K gross profit uplift identified
Appointed by an established online skincare brand (£1.4M ARR) that suspected hero products were underpriced but lacked evidence to act. Conducted Van Westendorp PSM (n=340) alongside 8-competitor benchmarking. All three methods converged: underpriced 14–22% on hero SKUs. Recommended 16–21% increases. Implemented with no measurable volume decline. GM improved from 70.6% to 74.6%.
- **UK-INDIAN Wholesale Distributor** — Inventory Optimisation (Confidential Client | £10.2M revenue | 3,788 SKUs)
Commissioned by a UK wholesaler unable to differentiate inventory strategy across its full product range. Performed ABC-XYZ classification and built a statistical reorder point model (95–98% service levels). Identified 816 SKUs (22%) driving 80% of revenue and flagged 22 as stockout risks. Designed an analyst judgment layer to ensure system recommendations aligned with real-world operational needs, protecting loyal accounts the algorithm would have wrongly cut.
- **Telecom Provider — Churn Prediction & Segmentation** | Subscription-based telecom business | 989 high-risk customers isolated
Engaged by a telecom provider to identify at-risk subscribers before cancellation. Built a Gradient Boosting model (ROC-AUC 0.842) with contract type as the leading predictor (35% importance). Isolated a high-risk segment churning at 65.8% vs 26.5% baseline, each worth £85/month. Designed four testable A/B retention interventions to give the retention team a prioritised action plan rather than an undifferentiated customer list.
- **Namastey India (3-Site Restaurant Group)** — Operations Dashboard | 22% food cost gap surfaced
Engaged by a multi-site Indian restaurant group whose operational data was fragmented across POS, rota, and waste management systems with no cross-site visibility. Consolidated data into the organisation's first unified operational platform. Identified Site 3 food cost running at 37% vs 30% benchmark. Isolated root cause to over-ordering — waste at 14.4% vs 2.7% at best-performing site — giving management a clear, evidenced basis for corrective action.

TOOLS AND SKILLS

- **Technical:** Excel (expert), SQL, Python (Pandas, Scikit-Learn), Power BI (DAX), Tableau, PowerPoint, SAP ERP (MM), Talend ETL, CRM Systems
- **Methods:** Requirements Gathering and Documentation, Business Process Mapping, User Stories, Use Cases, Requirements Traceability, Variance Analysis, Customer Segmentation, A/B Testing, Forecasting, Regression, Gradient Boosting
- **Business:** End-to-End Business Analysis, Stakeholder Management, Workshop Facilitation, Change Management, Pricing Strategy, Revenue Management, P&L Management, Unit Economics, Budgeting & Forecasting, Cost Optimisation, Agile/Scrum, Waterfall, Six Sigma Green Belt

VOLUNTEERING & LEADERSHIP

Lead Coordinator & Financial Volunteer, Sant Nirankari Mission (Global Humanitarian & Community Org.) | 2012 – Present

- Built a continuous 14-year record of community service, progressing into the core planning group supporting regional humanitarian initiatives, including health clinics, blood donation camps and environmental sustainability campaigns.
- Supported the operational and logistical setup for an international congregation in Zurich, coordinating cross-border volunteer teams, venue scheduling and attendee workflows.
- Supported financial administration, cash compliance tracking and budget reconciliation for organisational funds across the UK and Europe.

LANGUAGES

English: Fluent, **German:** B1- Actively learning

CERTIFICATES

Google Project Management Specialisation | Six Sigma Yellow Belt | Six Sigma Green Belt | AWS Cloud Practitioner (Nov 2026) | Microsoft Certified: Power BI Data Analyst Associate (Microsoft PL 300) (Oct 2026)
